NAME

archive_write_set_passphrase, archive_write_set_passphrase_callback — functions for writing encrypted archives

LIBRARY

Streaming Archive Library (libarchive, -larchive)

SYNOPSIS

#include <archive.h>

int
archive_write_set_passphrase(*struct archive **, *const char *passphrase*);

int
archive_write_set_passphrase_callback(*struct archive **,
    void *client_data, *archive_passphrase_callback **);

DESCRIPTION

archive_write_set_passphrase()

Set a passphrase for writing an encrypted archive. If *passphrase* is NULL or empty, this function will do nothing and ARCHIVE_FAILED will be returned. Otherwise, ARCHIVE_OK will be returned.

archive_write_set_passphrase_callback()

Register a callback function that will be invoked to get a passphrase for encryption if the passphrase was not set by the **archive_write_set_passphrase**() function.
